Chemical structure of 1-(4-iodo-2,6-difluorophenyl)-4-(4-(4-iodophenyl)-4-oxo-1,2,3,4-tetrahydropyrimidin-2-yl)-4,5,6,7-tetrahydrophthalazine. The structure shows a phthalazine core with a 4-iodophenyl group at position 2 and a 4-(4-iodo-2,6-difluorophenyl)-4-oxo-1,2,3,4-tetrahydropyrimidin-2-yl group at position 4. A bond length of 1.018 Å is indicated for the C-N bond in the pyrimidine ring.

The image displays a chemical structure of a complex molecule. The structure features a cyclohexane ring on the left, connected to a four-membered ring containing a nitrogen atom. This four-membered ring is further connected to a carbonyl group (C=O), which is linked to a benzene ring. The benzene ring has two fluorine atoms (F) attached. The benzene ring is also connected to an amine group (NH), which is linked to another benzene ring. This second benzene ring has a fluorine atom (F) and a chlorine atom (Cl) attached. A red oval highlights the bond between the nitrogen atom and the carbon atom of the amine group, with a label indicating a bond length of 1.022 Å.
