Chemical structure of compound 10, showing a piperidine ring connected to a pyridine ring, which is linked to a pyrazole ring, and finally to a fluorinated benzimidazole system. A bond length of 0.972 Å is indicated for the C-N bond connecting the piperidine and pyridine rings.

Chemical structure of a complex molecule, likely a pharmaceutical candidate, featuring a piperazine ring, a pyridine ring, and a pyrazole ring. The structure is shown with a bond length of 0.973 Å highlighted.
